

## Spring 1 Term. This term, Year 5/6 are learning:

## Mathematics

In English this half term, we will be looking at books linking to our new history component 'The Victorians' and reading a novel called 'Rooftoppers' by Katherine Rundell. Sophie, the protagonist, is an orphan looking for her mother after she was washed ashore in a cello box. The novel is a thrilling adventure story about perusing your dreams and never ignoring a possible! Our year 6 children will also be focussing on SATS revision more frequently with discrete practice of the tests to support their understanding of the SATS papers.

English

In maths this half term, UKS2 will be starting their learning on statistics and algebra. We will cover a lot over the Spring term including; ratios, percentages, decimals and volume. This is all new learning and follows on from prior learning in LKS2. Children will have the opportunity to explore these concepts through reasoning and problem solving. In science this half term, we are learning living things and their habitats. Pupils will study the details of life cycles and will consider the various stages, including metamorphosis in insects and amphibians and reproduction. Children will learn how a flower contains male and female reproductive organs. They will work scientifically to observe and dissect a flower. They will recognise the importance of pollination, which transfers pollen from the anther to a stigma within a flower, allowing fertilisation to take place.

Science

## PSHE

PSHE this half term is 'Dreams and Goals'. The children will learn about how they can reach their dreams and goals. They will discuss their dream jobs and the steps they will be able to take to reach their aspirations. The children will also look at the aspirations of different children from different cultures and how they will differ from their own.

French

By the end of this unit pupils will have the knowledge and skills to present both orally and in written form about the pets they have and/or do not have in French. They will move from 1st person singular to 3rd person singular verb usage, so they are able to say what the pet is called and use conjunctions more confidently.

## Music

This term in music we will be learning about 'Blues' style of music. Children will explore the features of Blues music and then learn to play the first line of the 12-bar Blues. After this, we will then study what the Blues scale is and practise playing the Blues scale in time with a backing track. Finally, children will look at being able to improvise with notes from the Blues scale and be able to play the scale notes out of order and

along to a backing track.
